

## HASA PHOS OUT for Pools

PROVEN TO ELIMINATE PHOSPHATES SOURCED FROM POOL CHEMICALS, FERTILIZERS, CLEANERS AND OTHER POLLUTANTS

**HASA PHOS OUT for POOLS** is proven to eliminate phosphates from sources such as fertilizers, cleaners, pool chemicals, and other pollutants.

### Superior Performance is Guaranteed!

**Effective** – One quart removes up to 1,000 parts per billion of orthophosphates per 20,000 gallons of water.

### DOSAGE:

Pool Capacity	Amount of Phosphates in your pool (ppb)			
	125	250	500	1,000
5,000 gal	1 oz.	2 oz.	4 oz.	8 oz.
10,000 gal	2 oz.	4 oz.	8 oz.	16 oz.
15,000 gal	3 oz.	6 oz.	12 oz.	24 oz.
20,000 gal	4 oz.	8 oz.	16 oz.	32 oz.

### DIRECTIONS FOR USE:

**Weekly Maintenance:** Use 1 fl. Oz. of **HASA Phos Out** per 5,000 gallons of pool water to maintain phosphate levels below 125 ppb (parts per billion).

### Initial high-phosphate treatment:

1. Clean or backwash filter.
2. Calculate the amount of product required using the dosage guide below. Pour **Phos Out** in the pool, distributing it over as wide an area as possible. Add 1 fluid ounce of HASA Eco-Safe Water Clarifier per 5,000 gallons of swimming pool water.
3. Run your filter system continuously for at least 24 hours.
4. If filter pressure increases 10 psi over normal, clean or backwash filter.
5. After 48 hours test the phosphate level with a phosphate test kit approved for swimming pool use. If it is needed, reapply **HASA Phos Out**.

**NOTE:** It is normal for **HASA Phos Out** to cause cloudiness. Adding 1 fluid ounce of HASA Eco-Safe Water Clarifier will clear the water quickly.

### AVAILABLE PACKAGING:

**HASA PHOS OUT for POOLS** is available in one quart and one gallon sizes.
